1. What are some common data prepration operation you would use in time series data

Ans:-

1.Data Cleaning
2.Resampling
3.Time Based Features
4.Nomalizatio/Sacling
5.Decomposition
6.Lag Featues
7.Diffrencing
8.Windowing
9.Data Transfomation
10.Times Series Splitting

2. What are some example of time -series data can be mined?

Ans:-

3. What is sliding window method in time-series Forecostin?

Ans:-

4. Why does time series have to stationary?

Ans:-

5. How pearon correlation used with time series?

Ans:-
